

REQUIREMENT GATHERING QUESTIONNAIRE

Web Platform Customization & Brand Integration for Petrochemical Operations

Dear Client,

To ensure your web platform is tailored precisely to your operational scale, corporate identity, and commercial goals, we have prepared this comprehensive Requirement Gathering Questionnaire.

As a premium B2B petrochemical platform, your website is not just a digital brochure - it is a critical sales enablement, lead generation, and customer trust engine. Each question below is designed to extract the vital data needed to customize the prototype into your official corporate channel.

Please review the sections below, complete the response fields, and return this document to your consulting team.

SECTION 1: COMPANY IDENTITY & BRANDING

Establishing visual trust, corporate authority, and legal compliance.

Q1.1: Legal Entity Verification

What is the exact registered legal name of your company?

Why it matters: *In B2B commerce, buyers transact with legal entities, not just brand names. This name will be used in legal disclosures, terms of supply, email templates, and automated RFQ invoice headers to ensure commercial and legal compliance.*

Client Response / Input Area:

>

Q1.2: Brand Assets & Visual Identity

Do you have an existing logo, color palette guidelines, or a preferred corporate color scheme?

Why it matters: *Visual consistency builds instant professional recognition. We will map your exact brand assets (SVG logos, primary colors, secondary accents) to the CSS theme variables. If you do not have guidelines, specifying preferred tones (e.g., Deep Navy, Industrial Teal, Clean Slate) helps us construct a custom palette.*

Client Response / Input Area:

- **Logo file attached?** [Yes / No / Need Design Assistance]
- **Primary Colors:**
- **Accent Colors:**
- **Special Guidelines:**

Q1.3: Brand Narrative & Tagline

What is your official company tagline or mission statement?

Why it matters: *Technical buyers make stay-or-leave decisions in the first 3 seconds of visiting your homepage. Your tagline will populate the main Hero Header, clearly communicating your value proposition and business focus.*

Client Response / Input Area:

>

SECTION 2: CORE OFFERINGS & SEGMENTS

Taxonomy construction, navigation design, and search engine optimization (SEO).

Q2.1: Product Portfolio & Classifications

Please list the exact product categories or specific chemical grades you deal in (e.g., Industrial Oils, Automotive Lubricants, Process Oils, Speciality Solvents).

Why it matters: *This defines the site's primary navigation menu and filterable product grid. A clear taxonomy ensures that procurement managers and lab officers can navigate straight to their desired chemical family without friction.*

Client Response / Input Area:

- **Category A (e.g. White Oils):** Grades:
- **Category B (e.g. Transformer Oils):** Grades:
- **Category C (e.g. Industrial Lubricants):** Grades:
- **Category D (e.g. Petroleum Jellies):** Grades:

Q2.2: Technical Documentation & Specifications

Do you have technical specification sheets, certificates of analysis (COA), or grade tables that need to be published for buyers?

Why it matters: *Petrochemical buyers purchase on specs, not promises. Integrating tables detailing viscosity, flash point, pour point, and density directly into the product detail pages reduces sales cycles by letting procurement self-qualify.*

Client Response / Input Area:

- **Documentation available?** [Yes - PDF sheets / Yes - Text tables / No]
- **Sample specs to display:**

Q2.3: Targeted Industrial Sectors

Which primary industries do you cater to (e.g., Automotive, Cosmetics, Pharmaceuticals, Plastics, Power & Energy)?

Why it matters: *High-converting B2B websites are structured around the buyer's application. By understanding your target industries, we can build custom sector pathways showing how your chemical grades solve their specific operational challenges.*

Client Response / Input Area:

- ☐ Automotive / Transport
- ☐ Pharmaceuticals / Medical
- ☐ Cosmetics / Personal Care
- ☐ Plastics / Polymers
- ☐ Power & Energy (Transformers)
- ☐ Other (Please list):

SECTION 3: OPERATIONAL SCALE & TRUST FACTORS

Supply chain transparency and quality assurance metrics.

Q3.1: Startup Sourcing Agility & Capability Metrics (Stats & Trust Section)

As a new startup/starter, how should we represent your initial scale, distribution network, or agility to build trust with B2B buyers?

Why it matters: *In B2B chemical sourcing, startup status can be framed as a major competitive advantage. While legacy distributors have rigid schedules and high minimums, startups offer extreme agility, custom packaging, low Minimum Order Quantity (MOQ) flexibility, and highly dedicated founder-led technical service. Highlighting startup-friendly metrics (e.g., combined team technical expertise, monthly dispatch capabilities, or MOQ flexibility) builds instant commercial trust.*

Client Response / Input Area:

- ****Combined Team/Founder Experience in the Industry (Years):****
- ****Warehouse/Distribution Footprint or Initial Supply Capacity (e.g., Monthly MT capacity):****
- ****Minimum Order Quantity (MOQ) flexibility (e.g., "From single drum to bulk tanker"):****
- ****Primary target regions for initial delivery rollout:****

Q3.2: Accreditations & Regulatory Compliance

What corporate certifications or compliance standards do you hold (e.g., ISO 9001, REACH, GMP, USP/BP/IP standards)?

Why it matters: *Compliance is a mandatory gatekeeper in chemical supply chains. Displaying regulatory badges prominently in the Trust section of the homepage and in the product sheets instantly removes legal and quality-assurance bottlenecks.*

Client Response / Input Area:

- ☐ ISO Quality Management (e.g., ISO 9001)
- ☐ REACH Compliance (Europe)
- ☐ FDA / GMP Audited Facilities
- ☐ Pharmacopeia Standards (USP / BP / IP)
- ☐ Halal / Kosher Certifications
- ☐ Other certifications:

SECTION 4: LEAD GENERATION & CONTACT LOGISTICS

Routing commercial intent directly to your trade desk.

Q4.1: Geographical & Operational Infrastructure

Where are your main corporate office, manufacturing plants, or primary distribution warehouses located?

Why it matters: *Showing physical addresses, especially plants and warehouse hubs, validates operational substance. These locations will be plotted on interactive maps to help buyers calculate freight routes.*

Client Response / Input Area:

- **Headquarters Address:** Plot no-180, S-12, Opp Total Sports, Sector-11, Vashi, Thane Maharashtra, 400703
- **Manufacturing Plant Address (if applicable):** [Pending]
- **Distribution Warehouse Hubs:** [Pending]

Q4.2: Direct B2B Communication Channels

What are the official contact channels (general inquiry email, direct sales phone numbers, WhatsApp for business)?

Why it matters: *Different procurement officers prefer different communication flows. We will integrate phone icons, quick-email triggers, and real-time WhatsApp floating widgets to capture immediate, high-intent leads before they drop off.*

Client Response / Input Area:

- **Main Sales Hotline:** [Pending]
- **General Email Address:** akshay.cdac.mum.aug25@gmail.com
- **WhatsApp Business Link/Number:** +91 90821 81794

Q4.3: Lead Routing & Sales Desk Logistics

When a customer requests a bulk quote online, which email address should receive these detailed B2B lead notifications?

Why it matters: *Fast response times secure deals. We will configure your customized RFQ form to send real-time structured emails containing product selection, desired volume, target delivery date, and specifications directly to this inbox.*

Client Response / Input Area:

> akshay.cdac.mum.aug25@gmail.com

SECTION 5: LEGAL & TRUST FOOTER

Protecting intellectual assets and standardizing business terms.

Q5.1: Compliance Links & Supply Agreements

Do you require specific legal links in the footer, such as a Privacy Policy, Terms of Chemical Supply, or a corporate disclaimer?

Why it matters: *To comply with global privacy standards (GDPR/CCPA) and specify your exact terms of shipment and credit lines, your footer must link to established legal sheets.*

Client Response / Input Area:

- ****Privacy Policy:**** [Yes, we have one / Need boilerplate template]
- ****Terms of Chemical Supply / Sale:**** [Yes / No]
- ****Corporate Disclaimer (e.g., technical guidance disclaimer):**** [Yes / No]

Thank you for taking the time to complete this questionnaire. Your responses will directly shape the visual aesthetic, information architecture, and lead routing mechanism of your custom petrochemical platform.
